

OVERVIEW

HISTORY

Las Vegas, Spanish for “the meadows,” is the largest American city founded in the 20th century (1905). Westward-bound pioneers followed early Mormon settlers here. The building of Hoover Dam, the area’s first huge tourist attraction and primary supplier of electric power to the southwest, drew thousands of new settlers.

The legalization of gambling in the early 1930s transformed the city into an American hot spot, blazing like no other. Streets lined with stately domes still tempt travelers with the lure of tremendous wealth.

Today, the dream of a better life, one adding some 50,000 modern-day pioneers to the population every year, is coming true for many. From the urban upbeat tone of a big city to the wide-open spaces of the outlying landscape, there’s a place in Las Vegas for every new pioneer who decides to call it home.

The area’s tremendous growth rate is controlled, measured and purposeful. Local government and business entities recognize the potential for overcrowding and overbuilding, so they are designing new communities accordingly. Every year brings new schools, new roads and new health care facilities to meet the needs of this rapidly growing community.

GEOGRAPHY

Las Vegas is situated at the southern tip of Nevada in the Great Basin – the western region between the Sierra Nevada and Wasatch mountain ranges. Official elevation of the city at McCarran International Airport is 2,174 feet. The Las Vegas Valley itself is comprised of nearly 600 square miles and runs from northwest to southeast and slopes downward from west to east.

The mountains surrounding the valley extend as high as 2,000 to 10,000 feet above the valley floor. The Sheep Mountain Range bounds the valley on the north. The Black Mountains bound the valley on the south. The Spring Mountains are to the west, which includes Mt. Charleston, the region’s highest elevation, peaking at 11,918 feet.

NEIGHBORHOODS

Las Vegas is one of the fastest growing, most livable cities in America. From 2003 to 2004, the population grew to 1.7 million, a 6.4 percent increase from the previous year. In 2004, 29,472 new homes and 64,168 resale homes were purchased. The rapid growth of the Las Vegas metropolitan area has transformed numerous locations from raw desert into finely-tuned, well-established neighborhoods, each with its own unique style and personality.

Homes to fit every lifestyle, income and location preference can be found in the Las Vegas Valley. From the heart of the city to the furthest outlying neighborhoods, new residents can choose from existing homes in and around Las Vegas to newly furnished models in master-planned communities. While large and mid-sized, single-family homes dominate the Las Vegas area, apartments and condominium units are typically grouped within the development of each community, creating an even greater diversity of living options. Many of the larger developments subscribe to the master-planned community philosophy of offering an orchestrated mix of homes and neighborhood amenities. These communities enjoy a look and feel that promotes integrity of design and appearance. In addition to the abundance of housing to choose from, more than half of the new homes built in the Las Vegas Valley are ENERGY STAR homes.

Although property values continue to increase faster than the national average, median sale prices of homes in Las Vegas are among the most reasonable in the country, as are property taxes. Parks and recreation areas are strategically sprinkled throughout projects to create a warm and welcoming sense of community. Additionally, locals enjoy numerous amenities such as shopping centers, medical facilities, golf courses and tennis courts.

Clark County welcomes more than 38 million tourists and more than 50,000 new residents each year. The cities of Las Vegas, Boulder City, Henderson, Mesquite and North Las Vegas, as well as 19 unincorporated communities, make up most of Clark County's more than 1.7 million residents. In fact, Clark County's population makes up 70 percent of the state's population. The urban areas of Clark County's population provide services to a large unincorporated urban area that includes the Las Vegas Strip, McCarran International Airport, the Las Vegas Convention Center, the University of Nevada, Las Vegas and many urban residential areas. More than 680,000 people live in unincorporated Clark County.

Clark County plays a major role in the areas of tourism, transportation, public health, flood control and education. The county also aids in the operation of McCarran International Airport, other local aviation facilities and oversees Southern Nevada's only public hospital, University Medical Center. In addition, Clark County provides services for unincorporated townships and rural communities.

Southern Nevada is home to several incorporated cities. Each city is self-contained with its own city government, police and fire departments, hospitals, and school systems. The Las Vegas Valley is comprised of several jurisdictions and includes the cities of Las Vegas, North Las Vegas, Henderson and unincorporated Clark County.

LAS VEGAS

The fastest growing city in the U.S. for 15 straight years. Factors contributing to the metro area's growth include the exceptional climate, a prosperous and stable economy and a wealth of job opportunities. World-class amenities include luxurious hotels, fine dining restaurants, amazing shopping experiences and sensational entertainment venues.

The university district contains reasonably-priced housing for University of Nevada, Las Vegas students as well as an eclectic selection of bookstores and cafes. The Las Vegas Beltway connects the southern part of the Las Vegas Valley with the rest of the city.

HENDERSON

Henderson's ever-growing population is divided into two district areas. Much of the commercial and residential development is taking place in Green Valley, an upscale, master-planned community that originated in the 1980s. Although no formal division exists, most locals tend to refer to the Green Valley area as separate from the original Henderson, which was created as a town for Basic Magnesium, Inc.'s defense plants during World War II.

Now home to more than 200,000 residents, Henderson has 25 award-winning, master-planned communities and will soon be growing again since the city council annexed 8.5 square miles of land south of the Henderson Executive Airport. The area may one day be home to 600 acres of parks, two fire stations, one high school, two middle schools and nine elementary schools.

NORTH LAS VEGAS

Incorporated in 1946, North Las Vegas has successfully created an identity that is uniquely separate from its more famous neighbor to the south. North Las Vegas, now home to nearly 140,000 residents, comprises an area of nearly 80 square miles.

A 30-year economic redevelopment plan, launched in 1990, has already begun to pay dividends. The city is home to the bulk of Southern Nevada's manufacturing, distribution and industrial facilities. More companies are emerging, particularly in the older areas of the city, where an effort is underway to attract new business with an expanded redevelopment zone and public beautification efforts.

With more than 1,300 acres of industrial parks, North Las Vegas is known as a business-friendly city, but residential development is also on the rise. In 2000, the city purchased a 1,200-acre parcel of land from the federal government to be used for a Summerlin-style development of six upscale villages.

NORTHEAST LAS VEGAS

The northeastern quadrant of Las Vegas has seen the least amount of new development in the past few years, though its growth would still be considered substantial compared to other cities. On the outskirts of the northeastern area, several new communities are now open or under construction, offering spectacular views of Sunrise Mountain, Red Rock Canyon and the city skyline. Large home sites and lots are plentiful in developments. Homes here are close to Nellis Air Force base, the Mormon Cathedral and the Las Vegas Motor Speedway.

BOULDER CITY

Boulder City is located 25 miles southeast of downtown Las Vegas and 10 miles southeast of Henderson. Boulder City is best known as the city that was born during the construction of Hoover Dam. The town housed more than 4,000 workers during construction, which took place from 1931 to 1935.

The triangular-shaped Boulder City is the only city in Nevada without gaming. The city's residents enjoy security, lush parks and a small-town atmosphere. Strict regulations govern further growth. Instead of master-planned communities, the city fathers are implementing a 15,000-tree program – an effort to plant one tree for every resident in the city.

SOUTHWEST LAS VEGAS

Southwest Las Vegas has quickly gained footing as the next hotspot for residential development in the Las Vegas Valley. The prestigious communities of Spanish Trail and Spanish Hills have set the standard for the southwestern quadrant of the Las Vegas area. Spanish Trail, a gated 640-acre golf course community, has garnered national attention for its design, security and beautiful home sites.

Another golf course community, Rhodes Ranch, continues to grow as well. The newest development is Mountain's Edge, a 3,000-acre master-planned community that will have 12,000 homes when completed and 500 acres for open space, parks and trails. The completion of the Las Vegas Beltway has further stimulated construction in the far southwestern region of the valley.

SUMMERLIN

The Summerlin community is the most celebrated master-planned development in the northwest region of Las Vegas, and perhaps in the country. Situated along the western rim of the Las Vegas Valley close to the Spring Mountain Range and Red Rock Canyon National Conservation Area, the 22,500-acre community has been ranked as one of America's best-selling master-planned communities for 10 years.

Numerous, distinctive neighborhoods offer a variety of lifestyle choices. The area has an elaborate system of parks and recreational opportunities and residential retail amenities abound. More than 30 percent of Summerlin has been designated as "community space" for recreation and natural areas. Homes range from the \$200s to the millions for custom homes. Sun City Summerlin also offers a variety of living options for seniors.

EDUCATION

With a wide variety of educational options offered in Southern Nevada, residents willingly embrace the excitement of learning - whether it's elementary or graduate education. As the sixth largest school district in the nation, the Clark County School District serves more than 280,000 students. With over 300 elementary, middle and senior high schools giving parents a wide selection from which to choose. The Las Vegas Valley is also rich with a variety of private and parochial schools.

Nevada law requires school attendance for all children who are between the ages 7 and 17. A child must be five years old on or before September 30 to attend kindergarten, which is part of the regular school program. State laws require that a child must attend a state-approved kindergarten program or take a developmental assessment test to enter first grade. There are no exceptions to the age requirement except for students who became residents of Nevada after they completed kindergarten or first grade in another state.

PUBLIC SCHOOLS

The city's public school system is addressing the educational needs of the city's young population. To accommodate growth for the 2005-2006 school year, the school district added 11 new schools, which included seven elementary schools, three middle schools and one high school to the area.

Innovative schools within the district are continuously encouraging and challenging their students to perform at their best. School programs and initiatives promote better learning. The district works to communicate messages to parents through various communication and public relations programs.

School accountability reports contain detailed information about each school in Nevada. These reports are prepared annually in compliance with the federal No Child Left Behind Act requiring all Nevada school districts to inform citizens about the performance of local schools. Schools use these reports to develop academic plans to improve student achievement.

CHARTER SCHOOLS

In 1997, the state legislature passed laws allowing for the formation of charter schools in the state of Nevada. Although sponsored by the local school district, charter schools maintain their own board of directors and operate independent of the district's policies and regulations.

Charter schools are required to abide by state and county laws but are given a great deal of latitude in the day-to-day operation of the schools. The purpose of such alternative education is to improve education via a setting where innovation, experimentation and research can identify effective methods of instruction and then share those findings with more traditional classroom programs. For information about charter schools in the Las Vegas metro area, contact the Clark County School District at (702) 799-5011.

PRIVATE SCHOOLS

The Las Vegas metropolitan area is home to more than 100 private schools, from Pre-K through High School. The area's private schools include Baptist, Catholic, Christian, Lutheran and Jewish academies. Additionally, Las Vegas is home to a number of Montessori schools and Academies dedicated to a 'prepared environment' which helps the student develop according to his or her own capabilities in a noncompetitive, multi-age atmosphere. For more information about private schooling in the Las Vegas area, please visit Private School Review at www.privateschoolreview.com.

COLLEGES & UNIVERSITIES

There are more than 20 colleges and universities spread out across the Las Vegas Valley offering undergraduate and graduate programs in hundreds of disciplines. Many provide state-of-the-art facilities for students attending classes at community colleges or in doctoral universities. In addition, the area offers a large selection of vocational, technical and specialized schools that offer specific training in a host of career programs such as health care, fitness, gaming, air conditioning, fine arts, cosmetology and real estate.

DINING

Las Vegas is a city unlike any other. In a remarkably short period of time, Las Vegas has acquired a well-known quality by evolving into one of the most prestigious fine dining meccas in the United States.

Everywhere you look across the Las Vegas Valley, both on and off “the strip” there are numerous restaurants, upscale eateries, bistros, steakhouses, cafés and sandwich shops, tempting you to sample their culinary fares. While the buffets that made Las Vegas famous are still around, thousands of dining options are available. From ethnic restaurants to neighborhood eateries to fast-food franchises, there’s something to suit everyone’s taste.

It all started with Wolfgang Puck! Some of the country’s most famous chefs have opened restaurants along the resort corridor that compare favorably with the best New York and Los Angeles have to offer. Top California chefs Thomas Keller and Bernard Keller plan to open restaurants, while famed Bay Area chef Bradley Ogden recently opened his at Caesars Palace.

The arrival of celebrity chefs, and their award-winning restaurants, has transformed Las Vegas into the “dining Mecca of the world.” This is a sharp contrast to less than 10 years ago when fine dining establishments were limited. Here are several of our renowned chefs and restaurateurs:

Wolfgang Puck

Spago and Chinois (Caesars Palace)
Trattoria Del Lupo (Mandalay Bay)
Postrio (The Venetian)

Bobby Flay

MESA Grill (Caesars Palace)

Mark Miller

Coyote Cafe (MGM Grand)

Emeril Lagasse

Emeril’s (MGM Grand)
Delmonico Steak House (The Venetian)

Jean- Louis Palladin

Napa (Rio)

Victor Drai

Drai’s (Barbary Coast)

Todd English

Olives (Bellagio)
Onda (The Mirage)

Sirio Maccioni & Sons

Le Cirque (Bellagio)
Osteria Del Circo (Bellagio)

Julian Serrano

Picasso (Bellagio)

Michael Mina

Aqua (Bellagio)

Charlie Palmer

Aureole (Mandalay Bay)
Charlie Palmer Steak (Four Seasons)

Susan Feniger & Mary Sue Milliken

Border Grill (Mandalay Bay)

Alessandro Stratta

Renoir (The Mirage)

Piero Selvaggio

Valentino (The Venetian)

Joachim Splichal

Pinot Brasserie (The Venetian)

Gian Paolo Beloni

Zefferino (The Venetian)

Stephan Pyles

Star Canyon (The Venetian)

Kevin Wu

Royal Star (The Venetian)

Michael and Wendy Jordan

Rosemary’s Restaurant

Eberhard Mulle

Lutece (The Venetian)

Nobu Matsuhisa

Nobu (Hard Rock)

Jean Joho

Eiffel Tower (Paris Resort)

Gabino Sotelino

Mon Ami Gabi (Paris Resort)

Gustav Mauler

Spiedini (The Regent Las Vegas)
OXO (The Regent Las Vegas)

Brad Brennan

Commander’s Palace (The Aladdin)

Bradley Ogden

Bradley Ogden (Ceasar’s Palace)

Josef Keller

Josef’s Brasserie (The Aladdin)

Jean-Georges Vongerichten

Prime (Bellagio)

Las Vegas is home to FIVE 2005 Mobil Four-Star Restaurants. One hundred and forty restaurants across the U.S. and Canada have received this highly regarded Mobil Four-Star rating. Las Vegas’ Four-Star restaurants include, Aqua (Bellagio), Aureole (Mandalay Bay), Bradley Ogden (Ceasar’s Palace), Picasso (Bellagio), and Renoir (The Mirage).

Additionally Las Vegas has THREE of the 2005 AAA Five Diamond Awarded restaurants. Le Cirque (Bellagio) has received this award for the past 2 years and both Picasso (Bellagio) and Renoir (The Mirage) have been acknowledged, 4 years running.

Nobu in the Hard Rock Hotel was rated one of the top restaurants in the US in Zagat’s 2005 America’s Top Restaurant Guide. The Zagat survey of America’s Top Restaurants covers 1,383 of the best restaurants in 41 major U.S. markets.

DESTINATIONS

FLOYD LAMB STATE PARK

Originally known as Tule Springs, this park was an early water stop for Native Americans. It later became a privately-owned working ranch, as well as a guest/dude ranch in the 1950s. In addition to the Tule Springs Ranch Historic Area, the park offers tree-shaded groves alongside four small fishing lakes. The park is available for day use only.

GRAND CANYON NATIONAL PARK

Located in northern Arizona, close to the borders of Nevada and Utah, this national park is home to the Grand Canyon, created some 5 million years ago and encompassing 1,904 square miles. The Colorado River, which flows through the canyon, drains water from seven states. Recreational pursuits are vast, including hiking, camping, biking and fishing. Commercial air carriers and tour buses serve visitors from the Las Vegas area.

HOOVER DAM

Hoover Dam was built in the 1930s at a cost of \$160 million. The dam, located 40 miles southeast of Las Vegas on U.S. 93, turned the raging waters of the Colorado River into the still waters of Lake Mead. Government guides conduct various tours year-round.

LAKE MEAD NATIONAL RECREATION AREA

As the largest man-made lake in the world, Lake Mead extends 110 miles up from Hoover Dam. The recreation area covers some 1.5 million acres, and attracts more than 8 million visitors annually for swimming, boating, skiing, fishing and camping. Fishing is open year-round, and anglers harvest large numbers of game fish each year.

MOUNT CHARLESTON

Located 45 miles northwest of Las Vegas, Mount Charleston is situated among some 300,000 acres of forestland in the Las Vegas Ranger District. The area includes 52 miles of hiking trails, 160 picnic spots and 150 campsites in seven campgrounds and RV camps. Recreational activities include horseback riding and snow skiing.

OLD LAS VEGAS MORMON FORT STATE HISTORIC PARK

The first permanent non-native settlers in the Las Vegas Valley were a group of Mormon missionaries who built an adobe fort along Las Vegas Creek in 1855. They successfully farmed the area by diverting water from the creek. Today, the park includes a remnant of the original adobe fort, which serves as a visitor center with interpretive displays.

RED ROCK CANYON NATIONAL CONSERVATION AREA

Red rock formations and desert scenery attract thousands of bicycle enthusiasts to the 13-mile loop road that winds along the western border of the Las Vegas Valley. Other activities include rock climbing, hiking and auto touring.

SPRING MOUNTAIN RANCH STATE PARK

Historic Spring Mountain Ranch is located within the Red Rock Canyon National Conservation Area, beneath the colorful cliffs of the magnificent Wilson Range. The many springs in these mountains provided water for Paiute Indians and later brought mountain men and early settlers to the area. This 520 acre oasis was developed into a combination working ranch and luxurious retreat by a string of owners who have given the area a long and colorful history.

VALLEY OF FIRE STATE PARK

Dedicated in 1935 as Nevada's first state park, this 56,000-acre wilderness area features colorful, extraordinary rock formations, Native American petroglyphs and year-round campsites.

CALIFORNIA DESTINATIONS

- Catalina Island
- Death Valley
- Disneyland
- Hollywood
- Joshua Tree National Monument
- Kings Canyon National Park
- Laguna Beach
- Lake Tahoe
- Mammoth Lakes
- Salton Sea
- Sequoia National Park
- Venice Beach
- Yosemite National Park

UTAH DESTINATIONS

- Arches National Park
- Bryce Canyon
- Canyonlands National Park
- Capitol Reef National Park
- Dinosaur National Monument
- Grand Staircase/Escalante National Monument
- Park City
- St. George
- Sundance Village
- Zion National Park

CULTURE

In addition to the entertainment offerings on the Las Vegas Strip, there are cultural institutions and mainstays on the Las Vegas performing arts scene that have been redefining the quality of life for all Las Vegans.

The Performing Arts Center at the University of Nevada, Las Vegas, has long been the home of arts and cultural programming in Southern Nevada. In the Center's performance spaces, three of the valley's top-producing organizations – the Las Vegas Philharmonic, the Nevada Ballet Theatre, and the Nevada Conservatory Theatre – perform full seasons of the finest in dance, theatre, and music.

The Center is home to the UNLV Symphony Orchestra, UNLV Jazz Ensembles, the UNLV Wind Orchestra, the Las Vegas Music Festival, and the UNLV Dance Department. In addition, the Performing Arts Center hosts its own season of performances – UNLV Presents – bringing the best international classical musicians and artists along with popular arts programming from a broad range of genres, including stars of Broadway and jazz, vocal groups, and the best names in modern dance.

In 1998, the Las Vegas Philharmonic was assembled in just a few weeks to put on a Fourth of July concert, a spectacular event that will forever mark the orchestra's birth date. Today there are more than 1,000 Philharmonic season subscribers and a Guild that has grown to more than 200 members. These two groups support the orchestra's varied programming and ever-expanding season lineup.

The Philharmonic has expanded its outreach to Clark County school children. Each year, through funding from title sponsors, local businesses and individuals, the Philharmonic conducts Master Classes with young musicians performing in the presence of one of the orchestra's highly acclaimed guest artists. These contributions also allow groups to provide a free symphonic experience for 14,000 fourth- and fifth-graders in collaboration with the Clark County School District Partnership Program. A Young Artists Competition is also conducted annually with winners performing solos in the Concert Series.

The Nevada Ballet Theatre (NBT) is a professional ballet company, dance academy and outreach/educational program. NBT reaches tens of thousands of audience members and teaches hundreds of students annually. NBT continues to grow in popularity with residents and tourists. The Academy of Nevada Ballet Theatre is one of the few professional dance schools in the nation affiliated with a professional ballet company. The Academy provides both intensive education in the highly structured and disciplined techniques of dance and related performing arts as well as classes for fun and fitness.

NBT's Education & Outreach Department works hard to ensure the performing arts are accessible to the kids who need it the most. Future Dance Creative Communities bring extended dance training classes to children in schools throughout Clark County.

With more than 2,000 season subscribers and 18,000 attendees each year, the Nevada Conservatory Theater (NCT) is among the most notable and best-attended performing arts organizations in Las Vegas. NCT is committed to bringing to Las Vegas the highest quality theater. Their productions feature professional actors, designers, and directors working alongside advanced graduate and undergraduate students recruited from around the country.

For a "theatre under the stars" experience, many residents head out to Super Summer Theatre, located in the historic Spring Mountain Ranch state park. The historic park encompasses 520 acres of an old ranch near the base of the cliffs within Red Rock Canyon National Conservation Area, and is only about a 20-minute drive from Las Vegas.

Super Summer Theatre stage productions have wide appeal. Previous summer's line-up featured a host of musical comedies, including *Seussical*, a musical interpretation of favorite stories by Dr. Seuss, *Once Upon a Mattress*, a popular Broadway offering, and *Guys and Dolls*.

In addition, the area has more than 50 performing arts centers and cultural organizations that enrich the lives of residents and visitors. For those on the fast track, the new 107,000 seat Las Vegas Motor Speedway, located just eight miles north of downtown Las Vegas, adds to the attraction of the area.

HOSPITALS

Desert Radiologists provides in-house diagnostic services at a number of hospitals in Southern Nevada, UMC, Summerlin, Spring Valley, Desert Springs and Boulder City hospitals.

University Medical Center (UMC) has been serving the health care needs of Southern Nevadans since 1931. University Medical Center is the state-designated Level I Trauma Center for Southern Nevada and houses the state's only burn care facility. UMC is affiliated with the University of Nevada School of Medicine and serves as the state's major clinical campus, offering residency programs in internal medicine, obstetrics and gynecology, family practice, general surgery and pediatrics.

Summerlin Hospital Medical Center, located in Summerlin, one of southern Nevada's fastest growing communities, features 274 licensed beds. The acute care facility has adjoining outpatient services for surgery, laboratory and radiology as well as two medical office buildings. The hospital is situated on a 40-acre campus with room to accommodate future expansion.

Spring Valley Hospital was the first acute care facility to open in the growing community of southwest Las Vegas. The facility features 210 licensed beds and provides both outpatient and inpatient services. Services include cardiology, surgery, intensive care and maternity services, featuring all-private oversized rooms, with a Level II nursery.

Desert Springs Hospital Medical Center, a 286-bed acute care facility located in southeast Las Vegas, has been providing quality healthcare to the residents of Southern Nevada since 1971. The hospital provides 24-hour emergency services, including a fast-track area in the ER to treat less acute patients. The hospital also has three full-service catheterization laboratories, a 107,000 square foot Medical Office Building and an Outpatient Surgery facility and is home to the Diabetes Treatment Center, the only ADA accredited diabetes program in Southern Nevada.

Boulder City Hospital has been operating as a non-profit facility for over sixty years. The facility provides both outpatient and inpatient services. Services include ancillary, cardiology, radiology, surgery, pulmonary, intensive care and physical therapy.

OTHER AREA HOSPITALS:

Mountain View Hospital
North Vista Hospital
Southern Hills Hospital
St. Rose Hospital, Sienna
St. Rose Hospital, de Lima
St. Rose Hospital, San Martin (June 2006)
Sunrise Hospital
Valley Hospital

TECHNOLOGY

Desert Radiologists continually invests in the most advanced technology, remaining the area's chief resource for the highest quality diagnostic care. All of our out-patient center modalities have received ACR accreditation.
